TECTUS® – the completely concealed hinge system

“Making something invisible is also design!” There is a certain appeal in designing items in such a way that their actual value is initially in the background, thereby giving space to other elements. Flush mounting is a stylistic principle that exudes minimalism and involves precise technology and perfection. The TECTUS series of concealed hinges offers unsurpassed quality, versatility and depth. The completely concealed hinge system TECTUS has been an integral part of the SIMONSWERK range since 2002. Thanks to its ongoing development, TECTUS is today more innovative and efficient than ever.

TECTUS® – the advantages at a glance

- completely concealed hinge system
- for flush-fitting architectural structures
- with load capacity of 60 to 300 kg
- comfortable 3D adjustment
- with an opening angle of 180°
- for unrebbated and rebatted flush doors
- for rebatted doors
- for timber, steel and aluminium frames
- with maintenance-free slide bearing technology

TECTUS – model versions from 60 to 300 kg

TECTUS hinges have impressive load-bearing capacities, being able to support door elements of up to 300 kg. They also have an opening angle of up to 180° and can be used with timber, steel and aluminium frames. The hinges can be adjusted in all three dimensions and require no maintenance. They are used on high-quality residential doors and functional heavy-duty doors in public buildings.

The wide range of finishes enables a variety of applications – they can be harmoniously tailored to an architectural concept and fittings and can completely blend into the background when the respective door is closed.

TECTUS® Energy – for permanent energy transfer

TECTUS Energy enables permanent energy transfer, without compromising on the design aspect of surface-flush appearances. It combines design, function and technology in an exemplary way and creates opportunities for new ideas. For fitting and operating electronic components in high-quality heavy-duty doors, the safe and permanent energy transfer is decisively important. TECTUS Energy secures the door leaf and permanently provides energy from the side of the frame without weakening the door or frame geometry. The technology provided together with TECTUS Energy offers compatibility with all standard versions of locks and fittings, while retaining all technical and optical features of the TECTUS product brand.

Model versions for special applications

TECTUS A8 – for claddings up to 8 mm

The “A8” versions provide new application possibilities as they can accommodate claddings of up to 8 mm on the door and frame construction. This gives the designer more scope when integrating the door element into the overall interior design concept.

TECTUS FVZ – for doors with recessed frame facings

With TECTUS FVZ, a design where the frame part is offset to the sash part, it is possible to integrate a door with a completely concealed hinge into the surrounding wall without any visible frame. The frame facing can be set back by 12 or 14 mm, to allow the door and wall sets to create a flush-fitting whole.

Model versions for special applications

TECTUS rebate

for rebated residential doors

For rebated residential doors SIMONSWERK offers the TECTUS TE 380 3D. The concealed hinge system is completely invisible when the door is closed. The hinge joint's special geometry allows for installation in the rebated door leaf with a receiver in the wood, steel or aluminium frame.

for rebated timber entrance doors

With the product novelty TECTUS TE 680 3D FD SIMONSWERK has further developed the successful product brand TECTUS and offers with this new model version a solution for conventionally rebated timber entrance doors. Easy mounting and convenient 3D adjustment make installation easy, while a circumferential seal ensures the required level of impermeability around the hinges. The innovative hinge system for timber entrance doors further impresses with a load capacity of up to 160 kg. The TECTUS Energy version with permanent energy transfer is also available.

TECTUS FR – with integrated intumescent kit

The TECTUS FR model version is equipped with an integrated intumescent kit. Whilst maintaining all routing dimensions and optical features of the TECTUS, they provide the perfect basis for use on fire-resistant door elements. In case of a fire, the intumescent kit swells, sealing the door around the hinges, thereby protecting against fire and smoke escaping into a neighbouring room.

Design meets function

A full range of concealed hinges

For applications ranging from high-quality interior doors to heavy-duty doors with special requirements in terms of load capacity and performance, SIMONSWERK has for years provided a comprehensive product range including a wide choice of its completely concealed TECTUS brand.

All the models in the TECTUS brand completely concealed hinge range for high-quality interior and functional heavy-duty doors have the same technical and visual features, and can be used with timber, steel and aluminium frames. They all have a uniform appearance, with a closed hinge body that hides the milling from view, and are available in a range of materials and attractive surface finishes.

TECTUS®

Versions for special applications

Special architectural situations, problematic spatial challenges or unusual planning tasks require individual solutions. The solutions presented here by SIMONSWERK complete the TECTUS product range.

TECTUS® A8

for doors with claddings up to 8 mm
load capacities of 100 to 300 kg

TECTUS® Energy

with permanent energy transfer
load capacities of 60 to 300 kg

**TECTUS® FVZ**

for constructions with recessed
frame facings
load capacities of 60 to 100 kg

**TECTUS® rebated**

for rebated doors
load capacities up to 60 kg

**TECTUS® TE 680 3D FD**

for rebated timber entrance doors
load capacities up to 160 kg

**TECTUS® FR**

with integrated intumescent kit
load capacities of 80 to 200 kg

TECTUS® A8

Cladding on the door and frame construction

“A8” versions provide new application possibilities as they can accommodate claddings of up to 8 mm on the door and frame construction. This gives the designer more scope when integrating the door set into the overall interior design concept.

Functional areas

TECTUS® Energy Integrated and permanent energy transfer

Energy transfer is crucially important in the installation and operation of electric components in high-quality doors. With TECTUS Energy, the door leaf receives a guaranteed and permanent energy supply from the frame, without weakening the structure of either the door or the frame. The technology provided by TECTUS Energy offers compatibility with all the most popular designs for locks and fittings.

Clip

- secure connection between cable and hinge housing
- high functional reliability and fitness for purpose thanks to a closed system

Adapter technology

- compatibility with all the most popular designs for locks and fittings
- three different plug connections (round cable, universal adapter, adapter 1)

Flat ribbon cable

- 16-wire ribbon cable
- integrated permanent energy transfer
- entirely enclosed in the housing (closed system)

TECTUS FVZ

for unrebated residential and heavy-duty doors with recessed frame facings

hinge	recessed frame facings	60 – 100 kg
-------	------------------------	-------------

eg. TE 541 3D FVZ

eg. TE 541 3D FVZ

eg. TE 311 3D FVZ 40

eg. TE 541 3D FVZ

Product features

- FVZ = recessed frame facings
- recessed frame facing 12.0 or 14.0 mm
- completely concealed hinge system
- for timber, steel or aluminium frames
- for unrebated heavy-duty doors
- sideways closed hinge body for a homogeneous mortise appearance
- comfortable 3D adjustment (side +/- 3.0 mm, height +/- 3.0 mm, compression +/- 1.0 mm)
- maintenance-free slide bearings

Finishes

polished brass (O30), polished nickelled (O38), satin brass (O47), RAL 9016 Traffic White (O70), RAL 9005 Matte Black (107), Satin Chrome Look (F1) (124), Satin Nickel Look (F2) (125), Stainless Steel Look (SSL) (126), Satin Nickel (144), Satin Chrome (146), Rustic Umber (156), Bronze Metallic (168), Bronze Finish (174), Bronze Finish light (175), Bronze Finish dark (176), other finishes available upon request

Combination

receiver	casing frame	TE... 3D FVZ FZ
	steel frame	TE... 3D FVZ SZ
	steel door	TE... 3D FVZ ST

Functional areas

fire resistance, smoke resistance, soundproof

Note

i The load capacity mentioned above refers to the use of two hinges per door leaf (1x2 m).

Test evidence for functional doors to be achieved with full door sets.

TECTUS® rebated for rebated residential doors

SIMONSWERK also offers within the TECTUS brand a solution for rebated door leaf. The concealed hinge system is completely invisible when the door is closed. The hinge joint's special geometry allows for installation in the rebated door leaf with a receiver in the wood, steel or aluminium frame.

Assembly

TECTUS series

door

Fix door part with enclosed wood screws.

eg. TE 540 3D

frame

Block frame

Conduct routing, cutter 24 mm Ø (TE 240 3D cutter 16 mm Ø) and collar ring 30 mm Ø, affix frame part with enclosed wood screws.

Casing frame

To guarantee a stable mounting the use of an additional fixing plate is required. Affix the fixing plate behind the casing. Affix the hinge by using enclosed M5 screws.

Steel frame

Affix frame part of the hinge with the prepared receiver inside the door frame by using the enclosed M5 screws.

Fix cover plates on the frame and door part by means of the enclosed screws.

eg. TE 540 3D

eg. TE 540 3D

Adjustment

TECTUS series

Three-dimensionally, continuously adjustable

side	+/- 3.0 mm
height	+/- 3.0 mm
compression	+/- 1.0 mm

Side adjustment

- adjust the adjusting spindles using an Allen wrench

Height adjustment

- slightly loosen the clamping screws
- adjust the vertical position of the door by turning the lower height adjustment screw
(turn the upper height adjustment screw in the opposite direction if necessary)
- retighten the clamping screws

Compression adjustment

- slightly loosen the fixing screws
- put the door to the correct compression by using the compression screw
- retighten the clamping screws

All adjustments to be conducted by means of a 4 mm Allen wrench.

Hinge Positions

TECTUS Series

The use of a third hinge can significantly influence the load capacity. Frequently, a third hinge is positioned centred between the two outer hinges in order to meet visual requirements and to ensure the sealing pressure in the middle of the door. Under certain circumstances, however, it may be useful or necessary to support the upper hinge where the main tensile forces occur. This could be the case for over-wide doors (> 1000 mm) where additional forces occur due to the leverage. In such cases, the third hinge has to be positioned in the upper third, as this is the only way to positively influence the load capacity. The door norm recommends the use of a third hinge 350 mm below the upper hinge.

Application with increased load capacity or overhead door closers

Examples for applications with different door heights

< 2.40 m

≥ 2.40 m

Note: We recommend for all exterior doors the use of three hinges.

Service – comprehensive expertise for your daily work

We are happy to provide you with all the documentation you need to choose the most suitable hinge system for your requirements. Please contact us: we would be delighted to work with you to choose the best solution – from high-quality standard sets right up to the most complex solutions.

All our brochures and data sheets can be requested in a printed version, or you can simply download them on the spot – and the same applies to our fitting instructions, declarations of performance and CAD data.

Visit our **PRODUCTSELECTOR**

Whether you are a manufacturer, trade partner or designer, at www.simonswerk.com you can find precise, detailed product descriptions that will help you to choose the most suitable hinge systems.

www.simonswerk.com

SIMONSWERK GROUP – excellence in product and service

As an internationally operating group of companies, the SIMONSWERK GROUP is the market leader in the area of high-quality hinge systems. With over 900 employees worldwide, we stand for the highest quality standards, constant willingness to innovate and long-lasting customer relationships.

The SIMONSWERK brand combines the entire expertise in hinge systems and unites technical know-how with design standards at the highest level. In addition to innovative product solutions, we offer our customers the best service exactly where it is needed. From personal customer consultations and competent training courses to customised delivery and logistics processes or digital service tools.

Over 130 years of experience

The perfect foundation for continuous growth with experience

Internationally successful

As the market leader, we are constantly expanding our know-how

Over 900 employees worldwide

Every single employee shapes the vision of the SIMONSWERK GROUP

Focused product solutions

With high-quality hinge systems for heavy-duty, residential and entrance doors, we offer product solutions for all applications and materials

For our customers and partners

As SIMONSWERK GROUP, we are active in a variety of business models. Both in the construction project business and in cooperation with door manufacturers as well as with hardware dealers and processors, we develop perfect solutions, depending on individual market needs. We will provide our customers and decision-makers with the best possible support as a partner in accordance with their various requirements.
